

## Table of Contents

Foreword	x
Preface	xi
Acronyms and abbreviations	xiv
<b>PART 1     THREE- AND FOUR-MEMBERED HETEROCYCLES</b>	<b>1</b>
<b>Chapter 1   Epoxides and Aziridines</b>	<b>1</b>
1.1    Corey–Chaykovsky reaction	2
1.2    Darzens glycidic ester condensation	15
1.3    Hoch–Campbell aziridine synthesis	22
1.4    Jacobsen–Katsuki epoxidation	29
1.5    Paterno–Büchi reaction	44
1.6    Sharpless–Katsuki epoxidation	50
1.7    Wenker aziridine synthesis	63
<b>PART 2     FIVE-MEMBERED HETEROCYCLES</b>	<b>69</b>
<b>Chapter 2   Pyrroles and Pyrrolidines</b>	<b>69</b>
2.1    Barton–Zard reaction	70
2.2    Knorr and Paal–Knorr pyrrole syntheses	79
2.3    Hofmann–Löffler–Freytag reaction	90
<b>Chapter 3   Indoles</b>	<b>99</b>
3.1    Bartoli indole synthesis	100
3.2    Batcho–Leimgruber indole synthesis	104
3.3    Bucherer carbazole synthesis	110
3.4    Fischer indole synthesis	116
3.5    Gassman indole synthesis	128
3.6    Graebe–Ullman carbazole synthesis	132
3.7    Hegedus indole synthesis	135
3.8    Madelung indole synthesis	140
3.9    Nenitzescu indole synthesis	145
3.10   Reissert indole synthesis	154
<b>Chapter 4   Furans</b>	
4.1    Feist–Bénary furan synthesis	160
4.2    Paal–Knorr furan synthesis	168
<b>Chapter 5   Thiophenes</b>	<b>183</b>
5.1    Fiesselmann thiophene synthesis	184
5.2    Gewald aminothiophene synthesis	193
5.3    Hinsberg synthesis of thiophene derivatives	199
5.4    Paal thiophene synthesis	207
<b>Chapter 6   Oxazoles and Isoxazoles</b>	<b>219</b>
6.1    Claisen isoxazole synthesis	220

6.2	Cornforth rearrangement	225
6.3	Erlenmeyer–Plöchl azlactone synthesis	229
6.4	Fischer oxazole synthesis	234
6.5	Meyers oxazoline method	237
6.6	Robinson–Gabriel synthesis	249
6.7	van Leusen oxazole Synthesis	254
<b>Chapter 7</b>	<b>Other Five-Membered Heterocycles</b>	<b>261</b>
7.1	Auwers flavone synthesis	262
7.2	Bucherer–Bergs reaction	266
7.3	Cook–Heilbron 5-amino-thiazole synthesis	275
7.4	Hurd–Mori 1,2,3-thiadiazole synthesis	284
7.5	Knorr pyrazole synthesis	392
<b>PART 3</b>	<b>SIX-MEMBERED HETEROCYCLES</b>	<b>301</b>
<b>Chapter 8</b>	<b>Pyridines</b>	<b>302</b>
<b>8.1</b>	<b>Preparation via condensation reactions</b>	<b>303</b>
8.1.1	Hantzsch (dihydro)-pyridine synthesis	304
8.1.1.1	Description	304
8.1.1.2	Historical perspective	304
8.1.1.3	Mechanism	305
8.1.1.4	Variations	307
8.1.1.4.1	Guareschi–Thorpe pyridine synthesis	307
8.1.1.4.2	Chichibabin (Tschitschibabin) pyridine synthesis	308
8.1.1.4.3	Bohlmann–Rahtz pyridine synthesis	309
8.1.1.4.4	Kröhnke pyridine synthesis	311
8.1.1.4.5	Petrenko–Kritschenko piperidone synthesis	313
8.1.1.5	Improvements or modifications	314
8.1.1.6	Experimental	320
8.1.1.6.1	Three-component coupling	320
8.1.1.6.2	Two-component coupling	320
8.1.1.7	References	321
<b>8.2</b>	<b>Preparation via cycloaddition reactions</b>	<b>323</b>
8.2.1	Boger reaction	323
<b>8.3</b>	<b>Preparation via rearrangement reactions</b>	<b>340</b>
8.3.1	Boekelheide reaction	340
8.3.2	Ciamician–Dennstedt rearrangement	350
<b>8.4</b>	<b>Zincke reaction</b>	<b>355</b>
<b>Chapter 9</b>	<b>Quinolines and Isoquinolines</b>	<b>375</b>
9.1	Bischler–Napieralski reaction	376
9.2	Camps quinoline synthesis	386
9.3	Combes quinoline synthesis	390
9.4	Conrad–Limpach reaction	398
9.5	Doebner quinoline synthesis	407

9.6	Friedländer synthesis	411
9.7	Gabriel–Colman rearrangement	416
9.8	Gould–Jacobs reaction	423
9.9	Knorr quinoline synthesis	437
9.10	Meth–Cohn quinoline synthesis	443
9.11	Pfitzinger quinoline synthesis	451
9.12	Pictet–Gams isoquinoline synthesis	457
9.13	Pictet–Hubert reaction	465
9.14	Pictet–Spengler isoquinoline synthesis	469
9.15	Pomeranz–Fritsch reaction	480
9.16	Riehm quinoline synthesis	487
9.17	Skraup/Doebner–von Miller reaction	488
<b>Chapter 10 Other Six–Membered Heterocycles</b>		<b>495</b>
10.1	Algar–Flynn–Oyamada reaction	496
10.2	Beirut reaction	504
10.3	Biginelli reaction	509
10.4	Kostanecki–Robinson reaction	521
10.5	Pinner pyrimidine synthesis	536
10.6	von Richter cinnoline reaction	540
Subject Index		545
